

Spring Equinox from 2001 to 2023

Please find the UCT times for spring equinox from 2001 till 2023.

Read as from left to right columns

1. Gregorian year.
2. UCT (formerly known as GMT)
- 3, Ast (Atlantic standard time)
4. East Coast standard time (Gmt or UCT-5) However it will now be GMT -4 as spring clocks advance on March 14 2 a.m
5. Pacific Standard Time (UCT-8) it will now be UCT -7 for reason in 4.
6. Julian Calender Time.
7. Not given it will be UTC + 5.30 for IST March 20 2302 .Hence for India your sets will be all on March 21st.

What is a set.? If you would like to know -please e-mail me. [sam.billimoria@ gmail.com](mailto:sam.billimoria@gmail.com)

Like wise it will start at 10.32 a.m March 20th for West Coast USA and 1.32 p.m March 20th for East Coast USA , splitting the havan geh sets. to March 21st. i.e read for ASt in column 2

Adjust per your country time zones. Someone in Australia or New Zealand , Hong Kong, Singapore and UK might want to publish this on our list.
